

COMPLETED PROJECT

Bespoke Garden Spa

Bonogin

We were commissioned to design a garden spa positioned to take advantage of sweeping hinterland views. Maximising the connection to the landscape was a key design driver, leading to the inclusion of large-scale glazing throughout the front elevation. A custom-engineered steel frame was designed and fabricated to accommodate a 5.8m x 2.2 m sliding glass door assembly. Together with the clean lines of the Highland Tray cladding, the glazing creates a refined contemporary form that responds sensitively to its environment while providing an exceptional indoor-outdoor experience.

SCOPE	Custom building design and build
SIZE	6m x 6m
MATERIALS	Stratco Highland tray cladding with Stratco Cooldek roof panels
DURATION	4 Weeks

Council approved
